

REMARKS

Claims 1-18 are pending in this application. By this Amendment, claims 1, 2, 3, 10, and 12 are amended. No new matter is added. Reconsideration based on the above amendments and the following remarks is respectfully request.

The Examiner is thanked for the many courtesies extended to Applicant's attorney in the course of a personal interview conducted February 10, 2004. The substance of that interview is included herein per MPEP §713.04.

I. Request for Acknowledgement of Receipt of the Certified Copy of the Priority Document

In addition, in the Office Action Summary mailed January 12, 2004, the Office Action Summary acknowledges Applicant's claim for priority but asserts that only some of the certified copies of the priority documents have been received. Applicant respectfully submits that a certified copy of the one priority document Japanese Patent Application No. 2000-246861 was filed in the U.S. Patent and Trademark Office on September 28, 2001, as evidenced by the attached PTO Receipt for Filing of Papers bearing the U.S. Patent and Trademark Office date stamp of September 28, 2001. Also attached are copies of the cover sheet and first page of the priority document. Accordingly, Applicant respectfully requests acknowledgement of receipt of the certified copies of all of the priority documents.

II. Claims Define Allowable Subject Matter

Claims 1-18 are rejected under 35 U.S.C. §103(a) as unpatentable for U.S. Patent No. 6,412,070 to Van Dyke et al. ("Van Dyke") in view of U.S. Patent No. 6,275,825 to Kobayashi et al. ("Kobayashi").

Applicant respectfully submits that Van Dyke and Kobayashi, taken separately or in combination, do not disclose, teach or suggest "setting an identifier for identifying the object in association with the retrieval condition; and performing access control for an object

matching the retrieval condition and the identifier on the basis of the access right, as recited in claim 1 from which claims 2-9 directly or indirectly depend.

Applicant respectfully submits that Van Dyke and Kobayashi, taken separately or in combination, do not disclose, teach or suggest "access control means for managing ...an identifier set is association with the retrieval condition,...wherein the access control means performs access control for an object matching the retrieval condition and the identifier on the basis of a retrieval result by the retrieval means," as recited in claim 10 from which claims 11-18 directly or indirectly depend.

As reflected in the Interview Summary, Examiner Anh Ly agreed that claims 3 and 12 contained features, that are not disclosed in Van Dyke and Kobayashi. Accordingly, method claim 1 has been amended to include allowable features from claim 3. Similarly, apparatus claim 10 has been amended to include allowable features from claim 12.

For at least these reasons, it is respectfully submitted that independent claims 1 and 10 are distinguishable over the applied art. The remainder of the claims that depend from independent claims 1 and 10 are likewise distinguishable over the applied art for at least the reasons discussed above, as well as for the additional features they recite.

I. Conclusion

For at least these reasons, it is respectfully submitted that this application is in condition for allowance. Favorable reconsideration and prompt allowance of claims 1-18 are earnestly solicited.

Should the Examiner believe that anything further would be desirable in order to place this application in even better condition for allowance, the Examiner is invited to contact the undersigned at the telephone number set forth below.

Respectfully submitted,
